Reasons for allowance

The following is an examiner's statement of reasons for allowance:

The instant invention is deemed to be directed to an unobvious improvement to an engine piston over U.S. Patent No. 6,318,243 which teaches an engine piston having a crown 12 comprising an outer crown surface 34 adapted for exposure to engine combustion temperatures, an undercrown 32 adapted for exposure to crankcase fluids.

The improvement comprises a plurality of cooling pins extending from the undercrown for contact with crankcase fluids to assist in cooling the piston crown.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Prior Art

Prior art made of record but not relied upon is considered pertinent to Applicant's disclosure and consist of six patents.

Blose (1,073,086) is cited to show an engine piston having an undercrown with cooling structure but it is not clearly shown in the drawings either the cooling structure includes pins or conventional ribs and there is no mentioning of it in the specification.

Minter (1,741,032) is cited to show an engine piston having a plurality of pins arranged on the crown but fails to show the pins projecting from the undercrown.

Swanson (2,213,418) is cited to show an engine piston having an undercrown with cooling structure but it is not clearly shown in the drawings either the cooling

structure includes pins or conventional ribs and there is no mentioning of it in the specification.

Munoz et al. (4,363,293) is cited to show an engine piston having an undercrown with cooling structure but fails to teach a plurality of cooling pins.

Dent (4,617,888) is cited to show an engine piston having a plurality of pins arranged on the crown but fails to show the pins projecting from the undercrown.

Silvonen et al. (5,975,040) is cited to show an engine piston having an undercrown with plurality of pins extending from it's surface but fails to teach the pins being a cooling pins.

Contact information

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Kershteyn whose telephone number is (703) 308 8317. The examiner can be reached on Monday-Friday from 8:00 a.m. to 4:30 p.m.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Edward Look, can be reached on (703) 308 1044. The fax number is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is

(703) 308 0861.
